TEMSE

NOC_INTA4

SPECIFICATIONS

Power supply: min. 12 V DC. max 24 V DC.

Power consumption: min 11mA (1F 24V DC) - max 70mA (8F 12V DC)

Connection: 11 x screw terminal

Operating temperatures: -5 °C to +45 °C

Maximum humidity: 93% relative humidity, no moisture condensation

Type of protection (EN 60529): **IP20** (with front plate mounted)

Dimensions

1F, 2F, 4F: GLASS / STONE: **90 x 90 x 8 mm**

METAL / WOOD / CORIAN: 84 x 84 x 6 mm

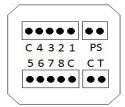

CORIAN 3D: 84 x 84 x 10 mm

8F: GLASS / STONE : 90 x 160 x 8 mm

METAL / WOOD / CORIAN:84 x 165 x 6 mm

INSTALLATION INSTRUCTIONS:

- 1. Remove power from the system.
- Connect the bus coupler with the needed switch wires.
 - C: to common wire on the input module
 - 1 to 8: to any input of the input module
 - No separate output for multi touch detection, multitouch is supported through individual switching of outputs1 to 8.

- Connect the 0V wire to the black terminal (-) and the 12V / 24V DC wire to the red terminal (+) of the bus coupler.
- The bus coupler fits a standard single British or European square or round wall box. Use two flat headed screws to fix the bus coupler.
- 5. Set the **rotary switch** to the appropriate **setting**.
- Plug the front onto the back unit. Make sure that the "TOP \u00f1" marking on the PCB (backside of the front) points upwards.
- **7. Repower** the system.

See our **NOC Technical Data sheet** for further explanation.

INTENSITY SERIES

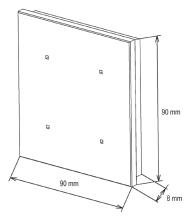

The Intensity of Tense is a capacitive touch based switch.

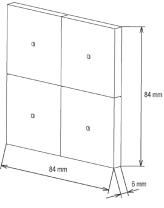

Depending on the type of front plate the Intensity has 1, 2, 4 or 8 touch zones with individual white LED feedback per touch zone. The LED feedback is adjustable in 2 settings: the first option is 70% brightness when untouched, when touched the white LED will light up to 100% brightness. The second option is no LED brightness is shown, but when touched the white LED will light up to 100%.

The processing of the generated touch signals depends on the connected third party input module. **Multi touch output** is supported without separate channel.

The Intensity can be installed on a regular single British or European square or round wallbox. The switch is surface mount, but can be made 100% recessed with the Trimless Wallbox delivered by Xillo[®].

Drawing Intensity Glass/Stone 4F

Drawing Intensity Metal 4F

ACCESSORIES:

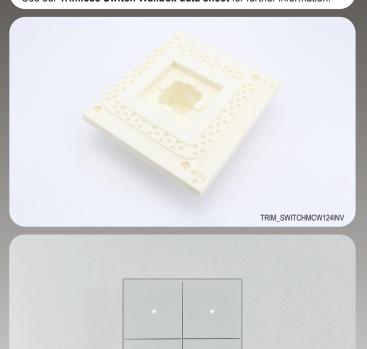

The Intensity can be completed by using accessories.

TRIMLESS WALLBOX

TRIM_SWITCHMCWINV124_BC (brick or concrete/metal, corian or wood), TRIM_SWITCHMCWINV124_P (plasterboard/metal, corian or wood), TRIM_SWITCHGS124_BC (brick or concrete/glas or stone), TRIM_SWITCHGS124_P (plasterboard/glas or stone),

The switch is surface mount, but can be made 100% recessed with the Trimless Wallbox delivered by Xillo®. The fixture is in one piece and completely made of the solid patented composite, so no need for an extra mounting kit. Easily install this wallbox in the wall thanks to the pre-drilled holes. The unique layered design and the handy indicators for laser positioning, make sure that every fixture is easy to plaster. In addition, the typical Xillo® pattern and large mounting surface ensure that the plaster is always perfectly fixated.

See our Trimless Switch Wallbox data sheet for further information.

NOC_INTAW4 & TRIM_SWITCH

CUSTOMIZATIONS:

Would you like to **personalize** your **products** permanently with inscriptions, logos and/or symbols? All Tense finishes are suitable for these customizations. **Engraving, printing, lasering...** are some of the available options.

See our Customizations data sheet for further explanation.

The Intensity series complies of 7 different touch-pad combinations in two product lines: The Intensity and Intensity Landscape. See our **Intensity Landscape data sheet** for further information.

SPECIAL FINISHES:

INTENSITY PAINTABLE

Do you like to subtly integrate your switch in your interior? Just paint the finishing plate and the switch is almost invisible. This front is made of a special composite material which can easily be painted in any colour matching the wall of your interior. For protection of the switch, a matt waterbased varnish can be sprayed over the paint.

INTENSITY WALLPAPER

This front is made of a special composite material and the sides can easily be painted in any colour, matching the wall or interior. Wallpaper, wood veneer, leather, fish skin, cork and other materials of a thickness up to 0,5 mm can be glued in the cut-out.

INTENSITY INTEGRATED

Tense can provide you the electronics to be placed behind a glass, Corian®, stone, ceramic or wooden wall. Furthermore, we can guide you with the instructions and dimensions regarding the cut-out at the back of these materials.

INTENSITY INVISIBLE

Want to lift your switch to another level of integration? then opt for the Intensity Invisible from Tense. Thanks to the combination of the Xillo® Trimless wallbox & the durable composite material, an in-wall switch is created which is elegant, stylish and nearly invisible. This switch can be easily finished in any color and type of paint of your liking.

See the relevant data sheets for more information about each of our special finishes.

FINISHES
